Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Discussion was made regarding the precise definition of a vector, and the functionality and placement of a register set, a microsequencer, a packet parser, and a modified search argument. Also discussed was the issue of determining whether the information was present, as opposed to interpreting the information. The examiner made it clear that further search - and discussion with a primary - was necessary before any issuance or examiner's amendment. The attorney agreed to discuss these issues with the applicant and to fax an amendment and/or remarks - both missing from the RCE Paper 8 - to be matched with the case in the week of August 11. Whether the applicants would amend the claims, and what limitations would be added or clarified, was not agreed on at the time of the interview.
